Summary

Detail-oriented recent Computer Science graduate interested in the Software Engineering and Web Development process. Interested in learning new technologies and working as part of a goal-oriented team. Experience with web scraping and REST APIs using JavaScript to increase functionality for an application. Currently enrolled in a coding boot camp with MIT and seeking a career in a Software Engineering related field.

Education

Professional Certificate in Coding: Full Stack Development with MERN   Expected: December 2022
Massachusetts Institute of Technology

Bachelor of Science in Computer Science   December 2020
The University of Texas at Dallas   GPA: **3.2**

Technical Skills

Languages: Javascript, Java, SQL, C#, C, C++
Software: Visual Studio Code, Github, MS Graph Explorer
Other: HTML, CSS, REST APIs, automated unit testing, Agile, problem analysis, communication/teamwork, customer service

Capstone Project

Amna   Fall 2020
An application to integrate various productivity applications
- Worked for a small start-up company as part of the integrations team to integrate platforms such as Google and Outlook calendars and mail as well as Microsoft To Do and ToDoist
- Built code to make elements of websites draggable into the Amna application
- Built code utilizing REST APIs to consolidate to-do lists from various platforms
- Created and used automated test cases to test functionality of methods

Relevant Coursework
